

## **Packing and handling**

For several years we have not had any damages under transport to our customers. This is a result of us not compromising in the choice of packaging. We use only extra strong and safe carton for all shipments.

This ensures that you as a Val Controls customer can always expect to receive everything in perfect condition.

## **Custom configuration and support**

We have expanded our service for all electrical units. Custom Configuration includes configuration by us of each unit according to your requirements. It also includes extra support during testing and commissioning, which ensures you easy and quick start-up.
