

VCDC Mobile

Val Controls Diagnostic Centre Mobile

The App Val Controls Diagnostic Centre Mobile, VCDC Mobile, can be downloaded on Google Play and makes your mobile phone to a local control panel for your Val Controls product. This application is compatible with the Val Controls product series supporting local control panel via Bluetooth interface. Features:

- Sync: Synchronization of valve signatures and test data
- PST: Starts a Partial Stroke Test
- FST: Starts a Full Stroke Test
- SOT: Starts a Solenoid Operated valve Test
- Open: Opens the valve system
- Close: Closes the valve system
- Status of the system is shown on the screen
- Adjust parameters

After synchronization all signatures can be transferred to A PC with VCDC for evaluation.

The application works only with Val Controls units with Bluetooth module.
